

A Qualified Opportunity Zone Fund

Education must prepare ALL students for success regardless of economic status. We are investing in a "data-proven", skills based learning platform, one that leverages gaming to teach critical skills without adding to teachers workloads nor classroom time. This technology and approach are both disruptive and rapidly scalable.

- 95% of schools use Chromebooks.
- Multiplayer games don't work on Chromebooks.
- But Heroes League Game Day does!
- We give real access to ALL students.
- This fact is a tremendous barrier to the competition.
